

Accessible Making:

# Designing and Building Musical Instruments in Mixed Ability Groups

Alex Lucas & Dr Koichi Samuels  
Performance Without Barriers

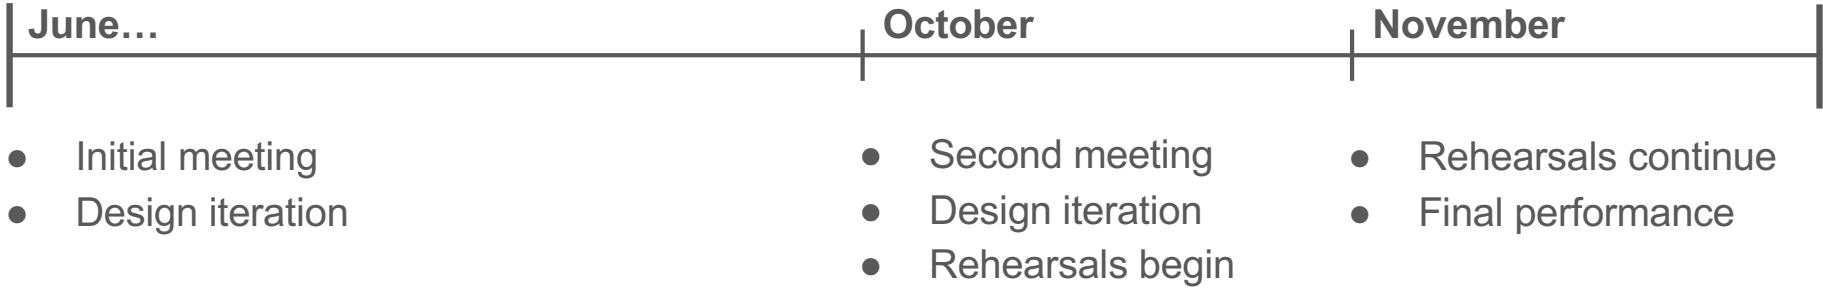

# Overview

- Bespoke Assistive Music Technology (AMT)
- Obsolescence
- Future Research
  - Our Goal: To Discover How To Support the Sustained Use of Bespoke Assistive Music Technology

# Bespoke AMT: Sonorities Timeline

← 6 months →

**Total Duration:** 2 weeks approximately

## Bespoke AMT: Sonorities Interfaces

- Musician: Hannah
- Designer: Ben
- Device: Joystick Pitch Controller

- Musician: Robyn
- Designer: Joe
- Device: Synthesiser Control Surface

- Musician: Meabh
- Designer: Brendan
- Device: Bead Sound Generator

# Bespoke AMT: Sonorities Technologies Utilised

Bespoke Assistive Music Technology: A Common Formula

Sensor

+

Microcontroller

+

Software application

+ Computer

# Bespoke AMT: Dependencies

*The Dependency Model of Music Access*

# Obsolescence...

is a problem for Bespoke AMT and...

## Assistive Technology

- Mobility Aids
- Prosthetics
- Communication Aids
- Computer Access Aids

What Causes the Obsolescence of AT?

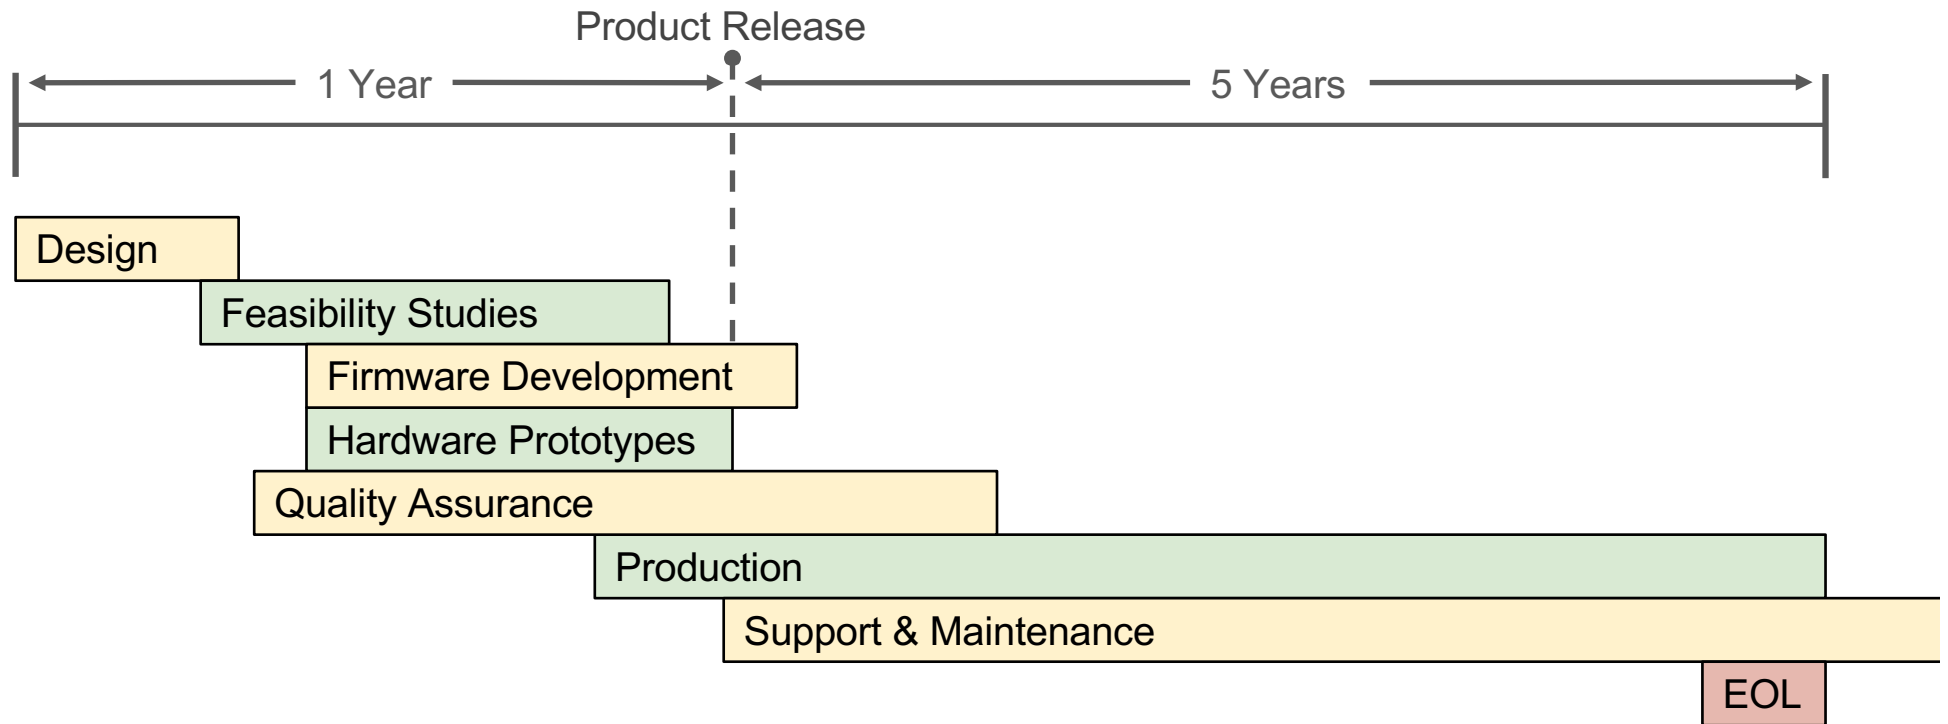

- *“A change in the needs of the user”.*  
(Phillips & Zhao, 1993)

## New Digital Musical Instruments

- *“It is common for new DMI’s to be set aside after only a few performances”.*  
(Morreale & McPherson, 2017)

# Obsolescence: Commercial Product Development Lifecycle

Typically, 75% of software developers time programming is spent undertaking maintenance tasks.  
(Raymond, 2001)

# Future Research: Supporting the Sustained Use of Bespoke Assistive Music Technology

- Create 4 bespoke assistive music technology devices with disabled musicians.
- Supported for 6 months
- Can we build a support community?

Tim

MaryLouise

# Future Research: Inclusive Making of Assistive Music Technology

*“Empowering users to make their own Assistive Technology can improve the adoption process.”* (Hurst, Tobias, 2011)

Boccia Ball Holder (Meissner, Vines et al., 2017)
